

Mini Key Tool

Description

COPYING CAR KEYS AND GENERATING REMOTE CONTROLS WITH XHORSE VVDI KEY TOOL MINIVVDI

Mini Key Tool is a device that allows you to clone transponders and generate both car and garage controls through your smartphone.

It is an essential tool for automotive locksmith professionals, as it clones all the transponders that can be copied and also has hundreds of remote control references in memory that can be generated instantaneously. You will be able to provide a fast and professional service by investing very little in stock of controls.

In addition, it also reduces the stock costs of transponders, since with a single reference, the SUPER CHIP; it is possible to clone all the car keys that have the capacity to be copied.

To operate it, all you need is a smartphone and download the XHORSE app. From there, you can access the team's feature menu and manage all available actions.

Features of Mini Key Tool:

- Transponder Copy
- Exclusive use via smartphone
- Generation of controls and transponders
- Copy of ID46/ID4D/ID48/ID4C/ID72/ID70
- Long-lasting self-contained battery life

For cloning ID48(Group, Chevrolet, etc.) Separate software purchase is required. Once activated, each clone spends 1 token.

Tokens can be purchased separately or can be earned as a reward for using the equipment, either by generating controllers or by cloning.
